

To Whom it May Concern:

I do not feel the FCC should implement any proposal that would lessen Indian's Telephone Privacy law protections. Prior to this law we received endless calls everyday interfereing with our dinner and family time. These calls were irritating and resented. Since signing up to be on the no-call list these unwelcomed calls have practically ceased. Many telemarketers use tactics to obtain private information from the homes they have called. This is a concern especially when children and elderly people are involved. PLEASE DO NOT implement anything that would change this law.
